ABOUT ME

Senior frontend engineer leading interface architecture across web and mobile, turning designs into fast, accessible applications. Works primarily in React, Next.js and Vue on the web and React Native and Flutter for cross-platform mobile apps, with a focus on component reusability, performance and a consistent design-to-code pipeline.

EDUCATION

Bachelor's Degree (Computer Science & Engineering)

LANGUAGES

English (fluent)

German (basic)

SKILLS & CERTIFICATES

React 10/10

Next.js 9/10

React Native 9/10

Flutter 8/10

Vue 8/10

INTERNATIONALITY

- Delivers web and mobile frontend architecture for clients across multiple regions
- Works closely with design and backend teams in distributed project setups

INDUSTRY FOCUS

Web Platforms / SaaS 9/10

Mobile Apps (iOS & Android) 8/10

E-Commerce Frontends 6/10

KEY FOCUS AREAS

Frontend Architecture

Leads component architecture and state management decisions across React and Next.js applications

Mobile App Development

Builds cross-platform mobile apps in React Native and Flutter, sharing design systems and logic across iOS, Android and web

Design-to-Code Delivery

Turns product and design specs into fast, accessible, production-ready interfaces

Performance & Accessibility

Optimizes load performance and ensures interfaces meet accessibility standards across client projects

RECENT PROJECT EXTRACT

2023 – today

Multi-Client Web & Mobile Frontend (React, Next.js & React Native delivery) – Senior Frontend Engineer

Industry: Software / Web & Mobile

Role: Senior Frontend Engineer

Description: Leads frontend architecture across several client projects on web and mobile. Builds reusable component libraries and cross-platform apps in React Native and Flutter. Turns product designs into fast, accessible interfaces using React, Next.js and Vue. Sets shared UI patterns and standards that keep delivery consistent across the team.

2021 – 2023

Web Application Frontend Development (multiple client engagements) – Frontend Developer

Industry: Software / Web

Role: Frontend Developer

Description: Built and maintained frontend applications across several client engagements, translating designs into responsive, accessible interfaces in React and Next.js. Developed reusable component libraries and established shared UI patterns to keep delivery fast and consistent. Integrated frontends with backend REST APIs and handled state management for data-driven views. Grew the component-architecture and design-system experience that led into the senior frontend role.

2020 – 2021

JavaScript Frontend & Mobile Development (React & React Native apps) – Frontend Developer

Industry: Software / Web & Mobile

Role: Frontend Developer

Description: Developed interactive single-page apps in JavaScript and React and shipped early cross-platform mobile features in React Native. Built dynamic UI components, forms and client-side routing, wiring them to REST APIs for live, data-driven views. Focused on responsive layouts, cross-browser behavior and smooth interaction across web and mobile. Deepened the core JavaScript, React and React Native fluency that underpins the frontend architecture work today.

2019 – 2020

Web Frontend Development (JavaScript & responsive UI) – Junior Frontend Developer

Industry: Software / Web

Role: Junior Frontend Developer

Description: Started building production web interfaces in JavaScript, HTML and CSS, turning static designs into working, responsive pages. Learned React and component-based development on live client projects, shipping small features under senior guidance. Connected UIs to REST APIs and handled form validation, state and basic client-side routing. Established the frontend fundamentals and JavaScript fluency that the later React and mobile work is built on.
